

fontaine fixed energy storage device underwater

What are fixed storage and energy transfer devices? The Fixed Storage and Energy Transfer Device are devices used to power Energy Transfer Terminals in Fontaine in Genshin Impact 4.1. Learn about Fixed Storage and Energy Transfer Devices, as well as how to use them! What are the Fixed Storage and Energy Transfer Devices? Where can I find fixed storage devices & energy transfer devices? Fixed Storage Devices and Energy Transfer Devices are an exploration mechanic in Fontaine currently found in the Liffey Region and Fontaine Research Institute of Kinetic Energy Engineering Region. They can be found both underwater and on land. Fixed Storage Devices are stationary and Energy Transfer Devices can be moved by the player. What is a fixed storage device? Fixed Storage Devices are energy storage units that are commonly seen near Energy Transfer Terminals and allow energy to be transferred from storage devices to them. They can easily be classified due to how their bases are fixed to the ground. Unlike the Fixed Storage Device, these can be picked up and placed anywhere within a limited area. Can storage devices provide energy to transfer and research terminals? Storage devices can provide energy to Transfer and Research Terminals. Pick up a portable storage device and put it next to a terminal that has stopped functioning to return it to normal operation. Community content is available under CC-BY-SA unless otherwise noted. Are there any upcoming NPCs related to Fontaine? There are no upcoming NPCs related to Fontaine. Fontaine features many unique mechanics and environmental hazards: Arkhe is composed of two opposing energy types: Ousia and Pneuma. When they meet, an annihilation reaction will be triggered. Where is Fontaine located? According to the Steambird, Fontaine is located in the center of Teyvat and is the source of all waters on the continent. Its entire continental plate is elevated, making it significantly higher than other nations. At the edge of Fontaine is a massive waterfall that stretches for thousands of meters. Blue Hydrogen Synergy: Fontaine's devices can store energy for electrolysis, turning seawater into hydrogen fuel. Think of it as a double-shot espresso for the blue economy. Lithium-Ion's Wet Cousin: Using advanced aqueous electrolyte batteries, these units avoid thermal runaway risks.
