Construction on Tesla's Megapack energy storage plant in Shanghai's Lin-gang Special Area is set to be completed by the end of this year, finishing in an impressive seven months. Breaking ground on May 23, the Megapack plant is on track to commence operations in the first quarter of 2023. The project, which will be built in Lin-gang, has an investment of 4 billion yuan (\$557.3 million), including a grid-side independent energy storage station and supporting facilities. In February, the Tesla Shanghai Megafactory -- Tesla's first overseas energy storage factory -- commenced construction. Construction on Tesla's Megapack energy storage plant in Shanghai's Lin-gang Special Area is set to be completed by the end of this year, finishing in an impressive seven months. Breaking ground on May 23, the Megapack plant is on track to commence operations in the first quarter of 2023. With an SMM reported on May 23 that this afternoon, Tesla Shanghai Energy Storage Gigafactory located in Shanghai Lingang New Area officially started construction and is expected to be put into operation in 2023. SMM reported on May 23 that this afternoon, Tesla Shanghai Energy Storage Gigafactory located in Shanghai Lingang New Area officially started construction and is expected to be put into operation in 2023. Shanghai luminaries have expressed hopes that Tesla's Megapack energy storage plant in Shanghai, for which the US electric carmaker broke ground at the Lin-gang Special Area on May 23, will serve as an icon for the region's enterprises and help foster an industrial cluster centered around energy. Tesla's energy storage plant in eastern Shanghai's Lin-gang Special Area broke ground on May 23, marking a major progress forward of this facility - the US electric carmaker's first of such facility outside its home country. Covering some 200,000 square meters, Tesla's new energy storage project is set to be completed by the end of this year, finishing in an impressive seven months. Tesla's energy storage plant broke ground in eastern Shanghai's Lin-gang Special Area on May 23, marking a major milestone as this is the first time the US electric carmaker has developed such a facility outside of its home country. Covering some 200,000 square meters, the energy storage plant is set to be completed by the end of this year, finishing in an impressive seven months. Lin-gang Special Area breaks new ground in becoming global. The project, which will be built in Lin-gang, has an investment of 4 billion yuan (\$557.3 million), including a grid-side independent energy storage station and supporting facilities. Tesla's energy storage plant in Lin-gang nearing completion. Construction on Tesla's Megapack energy storage plant in Shanghai's Lin-gang Special Area is set to be completed by the end of this year, finishing in an impressive seven months. Lingang energy storage development prospects. Following the ceremony, Lingang Group and Tesla signed a contract for China's first batch of Megapack ultra-large commercial electrochemical energy storage systems, marking a new milestone. Lingang Energy Storage Base: Powering Tomorrow's Grid Today. Well, here's the kicker - 42% of renewable energy generated in China last year was wasted due to inadequate storage. The Lingang Energy Storage Base isn't just another battery farm; it's a game-changer. Tesla unit seen lifting energy storage sector. The State-owned commercial conglomerate Lingang Group reached an agreement with Tesla on May 23 to make use of the latter's Megapack system, which will be the first batch of ultralarge Megapack. Tesla Shanghai Energy Storage Gigafactory officially started construction. SMM reported on May 23 that this afternoon, Tesla Shanghai Energy Storage Gigafactory located in Shanghai Lingang New Area officially started construction and is expected to be put into operation in 2023. New Tesla Shanghai energy storage factory gets go-ahead. The planned Tesla Shanghai Energy Storage Factory received its
